NOVA III?

Nova III is a peer-learning experience designed for those who refuse to be taught and choose to learn. We don't lecture. We don't test. We don't confine you to classrooms. Instead we create conditions for deep learning and growth.

Learning happens through doing, connecting, being challenged and experiencing problem in context. The depth comes from intergration of multiple experince types.

Peerbox is a community of extraordinary peers working on problems that matter. While learning from people who've done it. Traveling to see challenges up close. Building things that could change the world.

*"Some people don't lack potential.
They lack a system for unlocking it."*

WHAT MAKES US DIFFERENT

No teacher. Coaches, mentors, practitioners and peers guide you

No exams. Portfolio of real work and endorsements proves your capabilities

No lectures. Self-paced resources + hands-on projects and collaborations

No mass classes. Small cohorts and structured community of peers.

No Limits. Learn your own way, your own schedule, your own style.

WHAT TO EXPECT

- Project-based collaboration
- Workshops & debates
- Exchange programs
- Apprenticeships
- Conferences & Seminars

PROGRAM FEE

We're committed to making quality education accessible.

Investment varies based on:

- Pathway Selection
- Workshop & Tracks
- Apprenticeship level
- Group vs. individual learning

Schedule a consultation for a personalized quote that fits your budget and goals.

WHO IS THIS FOR

Peerbox is for ambitious individuals who

- Hate sitting through lectures
- Want to learn by doing, not memorizing
- Seeking flexibility to learn on their own schedule
- Need meaningful collaboration over mass classes
- Are looking for an Alternative Learning Experience

THE PEERBOX STYLE

*Every pathway is built around
this four core elements:*

PROBLEM DESK:

Real challenges and projects that practioners are actively wrestling with. Not textbook exercises - actual problems from the field that need solving.

RESOURCE DESK

Curated tools and knowledge you'll actually need in the field:

- **Physical:** Research papers, books, case studies, reports, materials
- **Digital:** Videos, simulations, tools, softwares, database

PITCH DESK

No exams. No grades. No memorization. Instead, demonstrate capability through:

- **Portfolio defence-** Present your body of work for peer reviews and expert feedbacks.
- **Project Metrics-** Did you add something real? Can you demonstrate impact?
- **Endorsement-** Does someone who knows excellence vouch for you?

PLAYLIST

This will be your to-do list:

1. **Weekly:** Co-working sessions, peer groups, coaching hours
2. **Monthly:** Seminars with practitioners, show & tell, skill workshops
3. **Quarterly:** Field trips, conferences, portfolio reviews
